

Reporting

Sustainability reporting is an integral part of in-Group reporting, Group financial information, public relations work and the continuous development of our strategy. Within the context of the Continuous Improvement Process (CIP), the reporting obligations of Group companies not only helps compile all of the sustainability-relevant information at a Group level, it also gives an important boost to the systematic improvement of our performance.

Sustainability Report

As a global player aspiring to market and brand leadership in the tourism sector, TUI feels a particular commitment to the principle of sustainability.

Learn more about our Group wide commitment in our Sustainability Report "[Guests in Paradise](#)".

Principles

We take into consideration international reporting standards like the guidelines of the Global Reporting Initiative (GRI/G3) and the Greenhouse Gas Protocol. Our reporting principles:

- Materiality
- Stakeholder Context
- Completeness
- Balance
- Comparability
- Accuracy
- Timeliness
- Clarity
- Reliability
